IDENTITY

Uppercase wordmark: VITE off-white, VAL blue (as approved).

Round flask in tight parentheses after the wordmark.

Short neck, smooth spherical outline, cyan liquid wave.

No floating bubbles, aggressive gradients, or ornamental effects.

DIGITAL USAGE

VoidZero-adjacent visual principles, distinct Viteval identity

TYPOGRAPHY

Bold, wide, geometric sans for headings.

Use restrained sans-serif body copy; monospace for code.

The wordmark artwork is not interchangeable with a font.

SPACING

Keep internal lockup gaps tight.

Use generous margins and simple dark surfaces.

Flask must not overpower text or parentheses.

ICON

Use the rounded flask alone for app icons/favicons.

Preserve the visible cyan liquid wave.

Review small-scale icons at 16, 24, and 32 pixels.

SVG QA

Construct with clean Bezier paths, not automatic raster trace.

No embedded bitmaps in any pure SVG deliverable.

Compare exact sizes against the approved PNG.
